Clarity and Jamf School API Integration

The API Settings in Jamf School provides a dedicated interface for controlling access to the Jamf School API and the Classic API. You will create a custom API Key having only the necessary capabilities for this integration.

Integration requires the following access rights: *Read*

Please contact client.support@diamondassets.com for additional information and support.

Creating an API Key

1. In Jamf School, click on ⚙ **Organization,** and then click **Settings** in the sidebar.

2. Scroll to find and click on the **API** section in the Settings side menu.

3. Click the **Add API Key** button.

4. Enter a name for the API Key.

6. Select the checkbox **Read** under Access rights. Uncheck the remaining options.

7. Click **Apply**.

8. Copy the **Key** and store for later.

Edit API key ✕

Name	DA Demo
Key	NK5CYKECBYN9D7NRTE2PL3MPPC69I3E9
